Johan Smit | 083 460 8097 | [johan.smit@kitformwork.co.za](mailto:johan.smit@kitformwork.co.za)

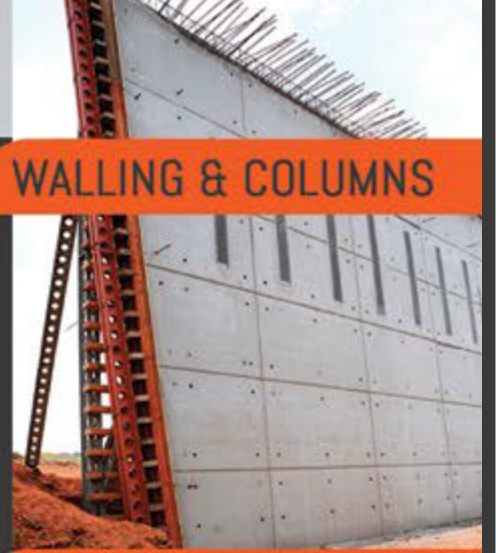

## WALLING & COLUMNS

### MINIMA

Modular wall formwork panels for concrete pressures up to 60kN/m<sup>2</sup>. Minima has the versatility to adapt to most building shapes, quickly & easily. The system is available in a wide range of panel sizes, allowing virtually any configuration.

### SUPERSLIM SOLDIERS WITH GTX & PLYWOOD WALLING

When using a plywood form face together with KIT's GTX timber beams, Superslim Soldiers can be used to construct straight, curved, conical or other complex formwork configurations. Used for a high architectural finish.

## FALSEWORK/SHORING

### RAPIDSHOR

A cost effective modular galvanized steel shoring system. High leg capacity up to 80kN saves material & labour costs. The modular system, easy to erect with regular patterns of snap on braces. Accommodates sloping ground & varying slab levels.

### ALSHOR PLUS

A high performance aluminium shoring system with increased safety features, load capacity & variable ledger frame positions. Leg loading up to 120 kN/leg. Greater on-site versatility and cost effectiveness.

### MEGASHOR

A heavy duty modular propping system for axial loads up to 750kN. From heavy lifting towers to travellers for tunnel formwork, bracing for excavations, shoring & trusses. An extremely versatile system with varied configurations.

## DECKING

### AIRODEK

A lightweight soffit formwork system, simple & fast to erect & dismantle. Designed for easy assembly, transportation, storage & maintenance. Can be used in conjunction with all of our falsework products.

### SUPERSLIM SOLDIERS WITH GTX

A definitive formwork primary beam, with an unrivalled strength-to-weight ratio, versatility & range of accessories. Robust & easily assembled into beams of almost any length. Can be re-used on varied sites & applications.

### KWIKSTAGE

One of the most universally established scaffolds throughout the world. Used for propping & decking applications. The simplicity makes Kwikstage a versatile, efficient & cost effective alternative to traditional loose props.

## SERVICES

### TECHNICAL DESIGN SERVICES

Our technical sales & experienced engineering staff will translate your requirements into cost effective formwork & shoring solutions. Early involvement ensures the best results. Compliant to ISO 9001/2008 standards.

### PRODUCT DEMONSTRATION & TRAINING

KIT has a demonstration facility at our Head Office. We are able to provide customers with a detailed understanding of our equipment. We also offer practical hands-on training in the use of our products, either at our facility or on-site.

### EQUIPMENT AVAILABILITY

With dedicated formwork storage yards throughout South Africa, KIT can respond quickly & easily to customer's requirements. A regional network ensures availability, flexible delivery & improved equipment storage as needed.
